

beer for good

Real talk: Our business impacts the environment. As such, we approach all operational aspects with a commitment to better business practices and reducing those environmental impacts.

THOUGHTFUL SOURCING & WASTE REDUCTION

We work directly with growers, focus on seasonality, and source organically whenever possible.

With our grain silo, we are bidding farewell to nearly 11,000 grain bags and reducing pallet shipments, resulting in reduced fuel and carbon emissions.

Pure's spent grain, our largest brewing byproduct, is repurposed as cattle feed.

WHERE WE CAN'T REDUCE, WE OFFSET

THE
CLIMATE
LABEL
CERTIFIED

We calculate the emissions created in all aspects of our business—from sourcing to manufacturing to shipping—and everything in between! We then offset these emissions through the purchase of verified carbon credits.

Even our merch is sourced from companies that share our core values of sustainability, charitable giving, and ethical operations.

WE GIVE BACK, TOO

We donate 1% of total sales to the conservation and regeneration of the wild places that sustain us. Through our non-profit partnerships last year, we helped **plant over 100,000 mangrove trees**, installed the 2nd-ever trash boom in Tijuana to **stop 180,000 lbs of trash from entering the ocean each year**, and supported **production of over 70,000 pounds of regenerative organic food in San Diego!**

WHILE YOU CAN COUNT ON US FOR THE FRESHEST, BEST-TASTING BEER AROUND, YOU CAN ALSO FEEL GOOD ABOUT OUR COMMITMENT TO MAKING A POSITIVE IMPACT IN THE WORLD—PROTECTING THE PLANET AND USING BEER AS A FORCE FOR GOOD.
